

Weekly Report 2016.05.09-2016.05.15

Progress:

1. Huawei Project

This week I went to Huawei and discussed with Feiran Wu.

The first part of the project is finally completed. We can start to finish the rest of the tasks and refine the system.

I also talked with Kai Han about the code performance. He told me what I should do to improve the performance of our system.

Plan:

1. Huawei Project

Write the patent.

Start to do the rest tasks.
